WHAT IS THE CLUSTER?

The Mobility and Logistics Cluster, MLC ITS Euskadi, is a private non-profit cluster which was founded in 2005. It works in the field of passenger mobility, freight logistics and related industry developing transport products, solutions, services and specific technologies (ITS – Intelligent Transport Systems), which make mobility increasingly safer, more efficient, sustainable and technologically advanced.

The Cluster develops its activity in the fields of innovation, internationalization and cooperation.

Clusters are "geographically close groups of companies and associated organizations, belonging to a specific field of activity and united by common elements and complementarities".

Michael F. Porter.

MISSION

The Cluster's mission is to drive the development and strengthening of companies and associated stakeholders, by bolstering innovation, internationalisation, sectoral cooperation and fostering synergies with other sectors.

VISION

The Cluster seeks to consolidate its position as the cluster organisation of excellence, by promoting the efficient and sustainable competitive improvement of the sector in the Basque Country, by supporting the development of Basque strategic sectors and by contributing to a better quality of life for society.

Vitoria-Gasteiz stands out as one of the benchmark cities in quality of life. Sustainability and the "Green" brand are one of its hallmarks. Within this framework, the changes we are witnessing in terms of mobility constitute a great opportunity to make Vitoria-Gasteiz the great logistics node in the north of the peninsula, which represents a great opportunity to boost the economy.

Market

The activity of the Department of Mobility and Public Space focuses on the development of infrastructures; the empowerment of the city as an international airport and as a logistics node; and the arrival of the High Speed Train. Internally, Vitoria-Gasteiz is committed to improving mobility from a sustainability perspective, with actions such as the development of the EIB project, the expansion of the tram network, the improvement of pedestrian safety and the promotion of mobility to foot.

DAIR INGENIEROS, founded in 1997, is a civil engineering and consultancy Company, located in Leioa (Bizkaia). The services we provide are carried out from a professional and independent point of view, with a strong commitment to innovation and a firm responsibility for sustainable development and respect for the environment. We offer a wide range of engineering and consultancy services around the world, from an integral multidisciplinary perspective and with high quality standards, accredited over more than 24 years of professional experience. Our main activity is related to the development and planning of transport infrastructure projects (roads and railways), water cycle related engineering, new urban developments and specialised consultancy mainly focused on the public administration. The scope of our work covers the entire engineering and consultancy value chain (feasibility, planning, design, construction supervision and technical assistance for operation, conservation and maintenance), providing services to public parties, private companies and joint ventures.

Market

We offer and provide appropriate solutions for differentiated markets, which allows us to provide personalised attention adapted to the needs of each client. We mainly work with the Public Administration, supporting and planning actions to adapt urban environments to the new demands of uses and developments. We also work with urban and interurban transport operators (including trains, buses, taxis, etc.), together with the rest of the actors involved in the correct development of transport and mobility. In addition, we provide services to industry, engineering firms and construction companies that need to cover a specialised niche in civil engineering. We bring specialisation and added-value to all work by completing preliminary studies, construction projects and tenders. We manage every aspect related to our field of activity. We also work with architectural firms and offices that develop new accessible spaces and urban master plans, as well as Real Estate companies, developers and investment funds. Finally, we offer our consultancy services in the field of sustainable mobility and planning to private companies that want to adapt their processes and plans to the current legal regulations in this area.

The Provincial Council of Bizkaia is an institution that is working with enthusiasm to become more modern and to make its 112 municipalities and their inhabitants feel closer to it every day. The government of the Historical Territory of Bizkaia is the Provincial Council, one of the main institutions of the Basque Autonomous Community. It is headed by the Deputy General (since 1 July 2015 the post has been held by Unai Rementeria, of the Basque Nationalist Party) and carries out a wide range of functions such as tax collection, town planning, roads and public works, the environment, cultural heritage and social welfare.

The Provincial Council of Gipuzkoa is responsible for governing and administering the province of Gipuzkoa. Its President is elected by the General Assembly and is responsible for implementing the programme of the government, which is made up of provincial councillors appointed by the President. The General Assembly is the governing body of the Provincial Council and is responsible for setting the guidelines for and aims of the provincial government's actions.

The Provincial Council has recognised competences as a provincial institution, especially in the areas of finance, economic development, roads and social policies. The General Assembly is the highest public representative and participatory body in the province and takes the form of a parliamentary body consisting of 51 councillors elected by universal suffrage.

The General Council of Gipuzkoa was created in the 16th century. At that time, the Council was made up of procurators designated by the General Assemblies and the council of the municipality in which the Assemblies gathered. Nowadays, the General Assemblies and the Provincial Council of Gipuzkoa are governed by the provisions of the Statute of Autonomy of the Basque Country and the Regional Provinces Act.

Ibilkari is an initiative that emerged in 2009 sponsored by Eusko Car Sharing Elkarte, a non-profit association created to encourage car sharing in the Basque Country.

Over the past 12 years we have developed social projects to promote a healthier environment and reduce mobility problems, through rational and responsible use of the car.

Inspired by the car sharing system, Ibilkari began with a pilot project in Bilbao, managing several cars and promoting the creation of several local initiatives, Fleet Management Services and Car Sharing in Neighborhoods.

All of them are still operating today, which encourages our belief that changes in mobility habits are possible and that we can do our part.

Mobilsafe .

663837350

<https://www.mobilsafe.es/>

info@mobilsafe.es

Mobilsafe, mugikortasun sektorean 20 urte baino gehiagoko esperientzia duen profesional talde batek osatutako aholkularitza eta ingeniarietza enpresa da, ibilgailuen kudeaketa optimizatuz eta arlo garrantzitsuetan onura argiak emanez, hala nola: segurtasuna, flotaren optimizazioa, araudia betetzea, flotaren elektrifikazioa, produktibitatea eta erregai aurrezteak.

Mobilsafe-k 2000. urtean ateara ireki zituenean, gure bezeroek lan egiten zuten mundua eta haien beharrak oso desberdinak ziren, baina denek helburu komun bat zuten: haien aktiborik baliotsuenak, flotako gidariak, babestea. Bi hamarkada geroago, eta gure flotaren kudeaketa irtenbideak mundu osoan 40.000 bezeroen 5.000.000 ibilgailutan instalatu ondoren, helburu hori ez da aldatu.

Market

Mobilsafe primarily targets businesses and organizations that manage large or complex vehicle fleets. This includes logistics and transportation companies, delivery services, public transportation operators, and corporate fleets. Their solutions are particularly appealing to companies focused on improving operational efficiency, reducing costs, enhancing driver and vehicle safety, and complying with environmental regulations. Mobilsafe is also highly relevant for organizations transitioning to electric vehicles, as they provide specialized services to facilitate this shift, making them a strategic partner for companies aiming to reduce their carbon footprint.

Additionally, Mobilsafe serves industries such as:

- **Public Sector:** Municipalities and government agencies that manage public transportation fleets or service vehicles, where compliance and sustainability are key concerns.
- **Construction and Field Services:** Companies operating heavy machinery or service vehicles that require strict safety monitoring and operational efficiency.
- **Retail and Distribution:** Businesses with delivery fleets that need real-time tracking, route optimization, and cost management to maintain competitive service levels.
- **Healthcare and Emergency Services:** Organizations where vehicle reliability, compliance, and safety are paramount, such as ambulances and service response units.

In summary, Mobilsafe's target market consists of any organization that relies on vehicle fleets as a critical component of their operations, particularly those looking to integrate advanced technology for better fleet management and sustainability.

Smartlog Group is a group of companies of international reference that provides intelligent and innovative intralogistics solutions adapted to the operational and business needs of the customer, whatever the sector in which it operates. With its headquarters in Urretxu (Northern Spain) it is currently present in Europe, and has subsidiaries in Central and South America, as well as in the Middle East and North Africa.

It has an extensive catalogue of technologies and equipment, enabling it to offer a unique, comprehensive solution to meet every need: smart AS/RS and storage systems, mobile robotic solutions for order fulfilment, sorting and conveying, AMR and AGV. It also has its own warehouse management software (WMS).

Market

Smartlog is positioned as a benchmark company in sectors such as hardware and DIY, fashion, healthcare, pharmaceuticals, cosmetics, food, industrial goods, electronics, logistics operators or aeronautics that operate in e-commerce, micro fulfillment and/or omnichannel environments.
